Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I am a student and i need my phone for emergencys and if tax is on it i wont be able to have it any more . And if something happens it could be YOUR falut for making a stupid tax!
Keep the USF Fair!

Think of all the people that you could hurt! Don't be unfair!!

Sincerely,

Sam Buck
